BLUE RIBBON Multipurpose Gear Lubricants are formulated with high-quality paraffinic base oil and a premium additive system to provide smooth, quiet performance with maximum protection against wear in gear applications, and can be used in limited-slip applications.

**FEATURES & BENEFITS:**
BLUE RIBBON Multipurpose Gear Lubricants provide superior thermal stability and minimize oxidative sludge and varnish formations in the most severe operating conditions. Highly effective anti-wear agents offer maximum protection against scuffing and wear, and also offer excellent load carrying capacity. Additionally, these products offer the following benefits:

- Non-corrosive properties
- Good resistance to foaming
- Outstanding rust and corrosion protection
- Excellent performance in low ambient temperatures

**APPLICATIONS:**
BLUE RIBBON Multipurpose Gear Lubricants meet the requirements of most manufacturers for differentials and manual transmissions. They are the right lubricant for conventional differentials in passenger cars, ligh-duty and heavy-duty trucks, and manual transmissions requiring GL-5 gear oil. These products are recommended for MIL-PRF-2105E, Mack GO-H and GO-J, API Service GL-5 and MT-1, Navistar B-22, and Meritor Automotive, Inc. (formerly Rockwell International) O-76-A and O-76-D.

**SELECTION:**
BLUE RIBBON Multipurpose Gear Lubricants are available in two viscosity grades, 80W-90 and 85W-140 as noted in the chart on the backside. Follow equipment manufacturer recommendations for appropriate viscosity grade.

**AVAILABILITY:**
BLUE RIBBON Multipurpose Gear Lubricants are available throughout Blue Ribbon marketing area. Your Blue Ribbon representative can provide specific information. Call Deckman Oil Co. @ 1.800.836.0562
